Recent tech stack: VueJs, ExpressJs, Python, MySQL, PostgreSQL, Firebase

Work Experience

Compass Interactive

Junior Full Stack Developer – *[February 2020- Present]*

- Developed and maintained e-commerce/microsites for MNCs like Nike, IKEA, Kiehls, & Brickmagic.
- Handled project requirements & timeline planning as well as code reviewed teammates' work.
- Managed multiple projects at a time.

Configura

Software Developer - *[February 2019 – September 2019]*

- Worked in cross-regional teams to automate the build, test, release, and versioning process of the company's proprietary software.
- Optimised total build time from hours to minutes.
- Managed and supported the CI/CD ecosystem which included JIRA integration, automated ticket updates, automated release branch merges, and more.

Configura

Intern - *[February 2018 – July 2018]*

- Implemented a high accuracy room detection system of floor plan images taken by low quality cameras.
- Improve the quality and speed of the photo rendering system within the company's software.
- Added a preview feature which sped up the rendering from minutes to seconds.

Projects

1. Protowire [WIP] <https://protowire-c9b08.web.app/>

An online wireframing tool that provides an intuitive and easy-to-use UI for sketching wireframes. Built with VueJS & Firebase.

Education

Monash University

February 2016 – February 2019

Bachelor of Computer Science

- 81.625% WAM
- 3.808 CGPA
- 3.51 GPA

Sunway College

March 2015 – December 2015

MUFY

- 86% Average Score
- Awarded Jeffrey Cheah Entrance Scholarship

Sultan Abdul Samad

January 2010 – December 2014

SPM

- 10 A, 1 B

2. CodeNames <https://codenames-the-game.web.app/>

An online multiplayer realtime version of the boardgame CodeNames. Built with VueJS & Firebase.

Achievements

1. Won 1st place in The Grand Challenge by MDEC (Regional hackathon)

- Worked in a team to implement a proof of concept adaptive lighting car park system that reduced energy consumption by 61%.

2. Invited to “The Next Big Tech Asia” (International conference and exhibition)

- Pitched our adaptive lighting car park solution to angel investors.

3. Achieved Top 10 in Unicode (University – level hackathon)

Key Strengths

Team player

Worked in a team consisting of individuals from various principles (Engineering, Business, IT) to implement a business and technical solution for a regional – level hackathon in which we won first place.

Effective Communication

Specifically highlighted by supervisor that I am able to simplify my explanation based on the level of expertise of the target audience.

Passionate to learn

Constantly taking initiative to learn new things and start various self-projects on my own.
